Condensed news:

a) When we serve food our priority is children; when the children are served then we serve also to adults.

b) Montalban is a locality two hours far from our operation centre; it is remote area and poorly served by relief organization.

c) Laguna is few hours from our Sectorial Office. But the Relief Operation in that area is organized by Sis. Ashisa who lives nearby. She cooks and distributes food every day; a complete report will be available soon.

d) So far more than 30.000 thousand people were served cooked food; more than 1500 families received relief items, thousands of people received drinking water and 193 people received medical treatments.
